Yes. And your comment makes sense.

Thanks. The Navy has a history of telling them something in a meeting that does not jibe with the paper they send. Unless the deadlines are insane I would rather react once we know the Navy's "argument."

Ok, are they sending that before the latest email/letter from the Navy?

Stuart,

Region 9 said they would be sending an email to both our offices articulating the support they may need. Part of it, I believe, is a national picture on use of BPRG calculator.

Dianna

**Subject:** RE: Region 9 Support

When the Navy came into to discuss pre-Covid, Schatzi and Laurence went to the meeting along with Mary, so I assume that would be a starting point.

I think the Navy is referring to the BPRG calculator. I suppose from the question they sent you they have given up on providing a technical justification on why RESRAD Build would be more appropriate for setting cleanup levels under CERCLA for radioactively contaminated dust inside buildings at Hunters Point.

I don't keep of the instances of when the BPRG is used.

**Subject:** Region 9 Support

Stuart,

Just giving you and OSRTI a heads up that Region 9 most likely be requesting HQ support for the building cleanup values for Hunters Point, I think they have five buildings. Not sure who the OSRTI team will be. I have included FFEO (Ava) on this email. I am making an assumption it will be MaryT and I from FFRRO. At the first of the year, I will be become the lead Regional Coordinator for R9. Some comments they had on our monthly call was:

Has the PRG calculator ever been used for residential cleanup values for radiation on buildings?

Hunter Point is a high profile site, HQ should be willing to back the PRG calculator for it to be viable at other DOD sites nationwide.

Thanks,
